Experiment -1

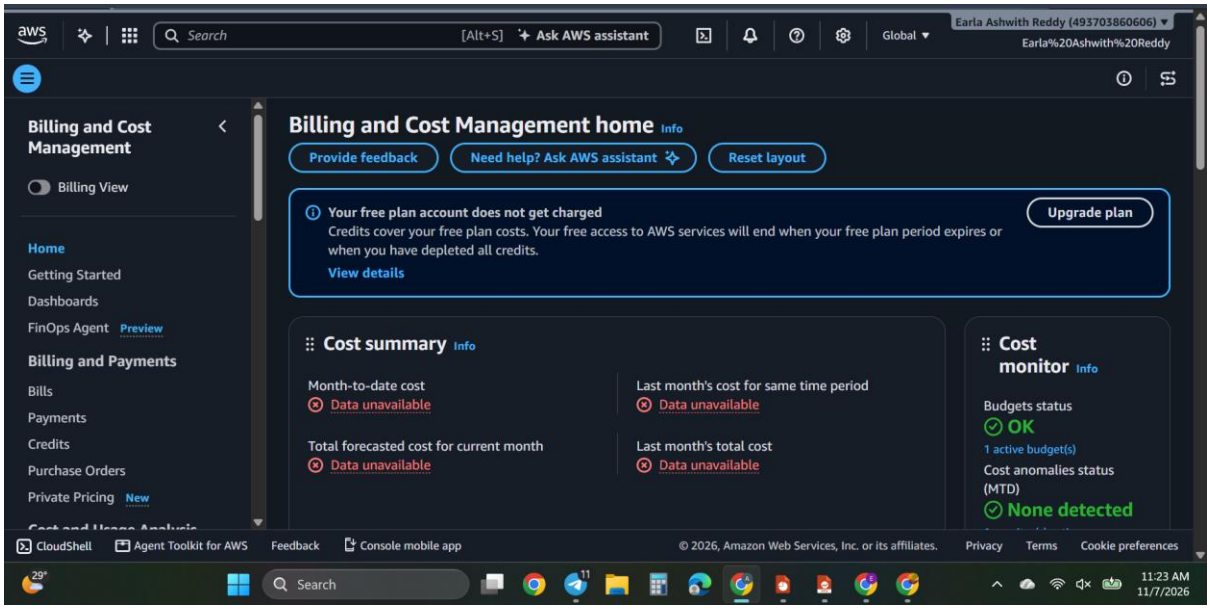

AIM: To create an AWS free tier account to provision the resources.

Description: Amazon Web Services (AWS) is a cloud computing platform that provides various services such as EC2, S3, IAM, and VPC. An AWS Free Tier account allows users to access and practice AWS cloud services within the applicable free usage limits.

Steps:

- Open Google Chrome and visit https://aws.amazon.com/free.
- Click on Create a Free Account.
- Enter your email address, password, and AWS account name.
- Verify your email address using the OTP.
- Select Personal Account and click Continue.
- Enter your personal details, including name, phone number, and address.
- Enter your debit or credit card details for verification.
- Verify your mobile number using OTP.
- Select the Basic Support Plan (Free).
- Click on Complete Sign Up.
- Wait for AWS account activation.
- Login to the AWS Management Console using https://console.aws.amazon.com.
- Verify that the AWS Management Console dashboard is displayed.

Output:

Successfully created and accessed the AWS Free Tier account. The AWS Billing and Cost Management dashboard was displayed successfully. The account shows an active budget with status OK, and no cost anomalies were detected. Thus, the AWS account was successfully configured for monitoring cloud resource costs.
